

# DUAL PROTECTOR

- SABS Approved
- 2-in-1
- CAT 2 ADM
- CAT 3, 4, 5

The design and development logic behind this unit is to provide security in controlled environments; retail, banking, hotels, casinos, offices and stores.

## Protection

With many years of experience and as a trusted name in the security marketplace, Mutual has constructed and designed its range of safes, to accommodate different volumes of secure storage capacity, as per the customer's requirements.

The Mutual Dual Protector CAT2 ADM, CAT3, 4 & 5 safes, serves as a multifunctional safe. It has overnight insurance protection of R50 000, R100 000, R200 000, and up to R300 000 respectively.

The SABS-approved top compartment contains a high-security deposit drawer. There is also extra space for secure storage overnight. The larger SABS approved bottom compartment, secures the day's deposits from the deposit drawer in the top compartment. The Mutual Dual Protector Safe is effectively 2 safes in 1.

The door locks are protected by dual plates of tempered glass. This will activate 2 randomly placed re-locking devices in the event of an attack on the safe. The highest quality in protection

## Construction

The Dual Protector range is manufactured using high technology barrier materials. This is to ensure the strongest protection against attempted burglary.
